DESCRIPTION

The 2-in-1 Lifter is a multi-function trolley that both climbs stairs and lifts loads. This device utilizes many intelligent technologies to ensure safe and convenient usage. It has a capacity of 170kg for both stair climbing and lifting functions.

It has a height-adjusting platform that raises or lowers automatically to help the operator maintain a better posture. This is a useful feature when stacking or unloading boxes of the same size and weight e.g. boxes of photocopy paper.

Used by logistics companies, delivery, loading and unloading cargo to/from trucks, moving furniture and household appliances and other industries, as well as factories, warehouses, offices, residential buildings, outdoor stairs and other places.

TECHNICAL DATA

Model: 2-in1 Lifter

Net Weight: 56.3kg

Lifting height: 1000mm

Lifting Capacity: 170kg

Battery Capacity: 320 (1 x time: one rise and one fall)

Rising/Falling Speed: 20 seconds top to bottom and vice versa

Overall Size: 1390mm*585mm*650mm

Climbing Capacity: 170kg

Climbing Speed: 22-36 Steps/min

Battery Climbing: 52-117 Floors

Weight of Battery: 3.2kg

Charging Time: 3 hours

Noise: < 70dB

Protection Level: IP54

PRODUCT DETAILS:

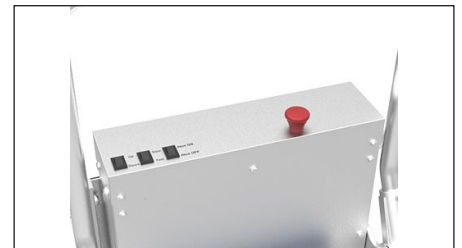

Multi-function

Stair-climbing, lifting, flat ground transportation, lift itself up/down the truck

Battery

Quick plug-in and install, large capacity

Safety Insurance Technology

Emergency stop, automatic brake system, position limited detection

Automatic Height-adjusting loading board

Useful when stacking goods

Self-lifted Up & Down

Easy to carry around and store without effort with the truck

Foldable Outrigger

Best support for different function with lay-down and foldable position
